-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Priority

Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence(s) of the specification or in an application data sheet by identifying the prior application by application number (37 CFR 1.78(a)(2) and (a)(5)). If the prior application is a non-provisional application, the specific reference must also include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number. In this particular case, the reference to Application number 10/680,699 is clearly incorrect, it appears that this application is a CIP of 10/680,669.

Specification

The use of the trademark Velcro has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Double Patenting

Art Unit: 3673

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 to 6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 to 5 and 10 to 14 of U.S. Patent No. 6,634,041. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present claims are nearly identical duplicates of the '041 claims, with the exception of that in the new independent claims 1 and 11 (corresponding to old independent claims 1 and 10) the clause setting forth the carrying strap has been removed and set forth in new dependent claims 4 and 12, respectively. This is within the ordinary level of skill in the art, since it is analogous to removing a component along with its function.

Claim Objections

In line 1 of claims 13 and 14 --of-- should be inserted after "said pocket" for clarity.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In line 3 of claim 7 the phrase "a pocket formed with on the towel" is indefinite, since as written the phrase is incomplete. It is unclear what the "with" is referring to.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7, 8, 19, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Sullivan (US 5,618,110). Sullivan shows a combination beach towel/tote bag assembly that comprises a rectangular terrycloth panel 12 that has a pocket panel 16 attached to one corner of the panel. A complementary panel 40 is attached in opposed relationship to panel 16, with an opening being formed by a circular channel 20 adjacent the mouth of the pocket. A drawstring 22 extends through the channel 20 to form a closure for the pocket. As shown in Figures 2 to 4, the towel can be folded and rolled up into a compact configuration adjacent to the pocket, and the pocket can be inverted over the towel to enclose the same. The drawstring 22 can be used to pull shut the mouth of the pocket if so desired. The interior of the pocket forms a lining with decorative features 40b, note that the corners of the pocket assume a rounded configuration when the pocket is inverted.
